Data Sheet

AX-150

Automation Component
Standard Table Width

Technical Data:

Forming force: (Cam disc & drive dependent)	max.150kN
Stroke: (cam dependent)	max. 45mm
Tool installation height in UT: (lower heights possible via adapter)	190mm to 380mm
Table surface between the tie rods: Total table width: Total table depth:	witdh 360mm x depth 260mm 460mm 260mm
Stroke position adjustment Basic setting: Fine adjustment:	 Setting in 4mm increments +-3mm, via threaded spindle on the press ram
Weight: (depending on drive and options)	approx.650kg
Dimensions: (width x depth x height, without drive)	390x456x1100
Number of strokes at 10mm stroke max.	600/min
Price without drive & central lubrication	Price on request

Optionen:

- Cam disks with different strokes and motion profiles
- Press force monitoring
- Interchangeable table plates
