Data Sheet

AX-50

Automation Component

Technical Data:

Forming force (cam disc & drive dependent):	max. 50kN
Stroke (dependent on cam):	max. 45mm
Tool installation height in UT:	80mm to 309mm
table surface	Width 350mm x depth 182
Stroke position adjustment Basic setting: Fine adjustment:	 Setting in 4mm increments +-3mm, via threaded spindle on the press ram.
Weight:	approx. 260kg, depending on the drive
Number of strokes at 10mm stroke max.	600/min
Price without drive & central lubrication	Price on request

Options:

- Cam disks with different strokes and motion profiles
- Interchangeable table plates
- Press force monitoring
