Datasheet

EX-51

CNC roller feed

Technical Data:

Speed	Up to 750[min-1] (depending on feed lenght)
Bandwidth´s	5 to 50mm
Band thickness	0,05 to 5mm
Weight	approx 30kg
Price without drive	Price on request

Performance characteristics EX-51:

- Compact, modular design
- Flexible cultivation options
- Scalable system design
- Intermediate ventilation with separate servo axis
- Virtual angular gearing to the main axis
- Material-friendly belt inlet guide
- Tool-free adjustment of contact pressure and strip thickness
- Spring for contact pressure that can be replaced without tools

Options:

- Servo motors from other manufacturers (standard: Siemens)
- Special attachment kits for integration into existing systems
- Special feed rollers (e.g. hard structured chrome plated or elastomer-coated;Undercuts for sensitive band areas)
